XXXXXXXXXX

Welcome to the *family*.

What started as a small family venture in Belgium over 35 years ago has grown into a global brand, trusted in over 120 countries. Yet at heart, we are still a family business: guided by care, connection and a relentless focus on quality.

Our philosophy is simple yet powerful: we design with comfort in mind. Every fixture, every detail, every innovation is created with the human experience in mind. Light should do more than brighten a room. It should elevate daily rituals, support well-being, and blend effortlessly with your home's architecture and interior. The right light creates an atmosphere that invites you to relax, sparks joy and creates spaces that feel intuitively right.

Founder Paul Ameloot and co-owners Jan and Peter Ameloot

Welcome to Deltalight. *Where Light becomes Comfort.*

Think about the moments you love most at home: the quiet pause of morning light, a lively dinner with friends, or the small, unplanned moments that make you smile. Light is there in all of them: shaping the atmosphere, guiding the rhythm, and making spaces feel like yours.

A home is more than walls and windows. It's the canvas where your life unfolds, the place you retreat to, and where your story is written.

At Deltalight, we design lighting that goes beyond illumination, bringing ease, warmth, and belonging into every corner of your home.

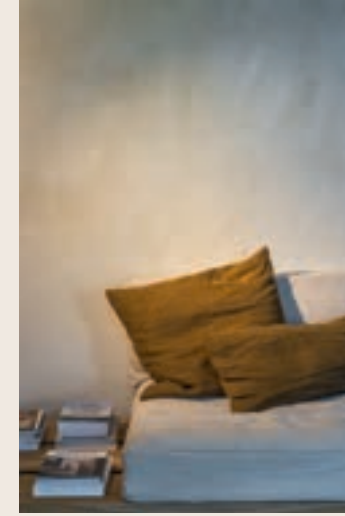

Every home has a story. *We help you tell it through light.*

Comfort in every corner.

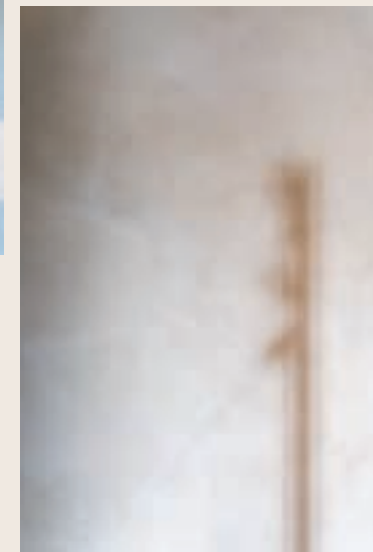

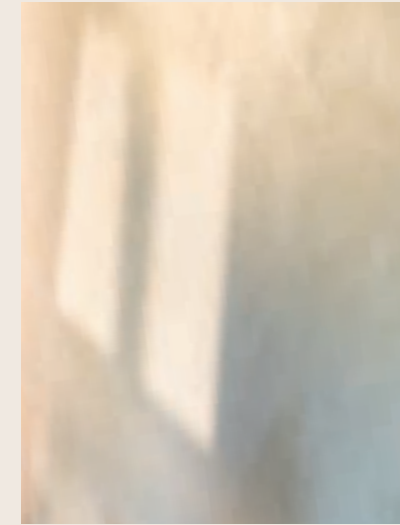

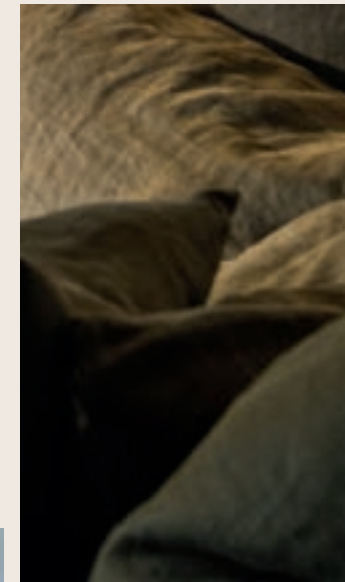

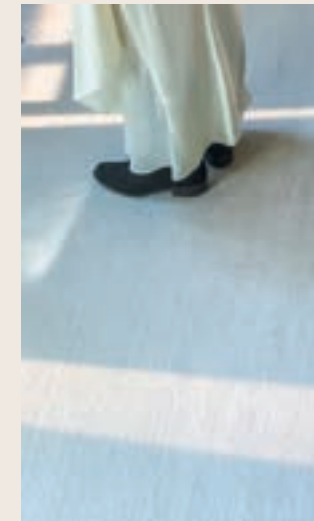

It's often the smallest details that make a house feel like home: a welcoming glow in the hallway, light that brings artwork to life, or the balance that turns an evening into a moment of connection. Like the ritual of putting on a vinyl record, these quiet details create rhythm and atmosphere; turning the everyday into something timeless.

Shaping your home together.

Every home has a story, and light should be part of telling it. That's why we design with you, not just for you, blending your vision with our expertise and offering more than 14,000 possibilities to suit your lifestyle. Together with architects, designers and specialists, we make sure your home feels exactly as it should: effortless, personal and inspiring.

L'Officine

Behind every beam of light,
is a commitment you can count on.

Light you can rely on for years.

When choosing lighting, you're investing in comfort that should last. Our designs are made to last and look beautiful today, tomorrow, and years from now. Quality is the foundation of everything we do. Our dedicated in-house design, research and engineering teams continuously refine materials, finishes, and technologies to ensure our lighting stands the test of time, both technically and aesthetically. With a 5-year warranty across our entire range, we offer more than lighting. We offer peace of mind.

A personal approach.

We see every collaboration as a partnership, built on dialogue and support. You're not just a project, you're a partner. From the first spark of inspiration to final installation, we're there to guide you with care, insight and tailored expertise.

Looking ahead.

Innovation and sustainability are part of our DNA. We continuously explore ways to reduce our environmental impact by embracing circular design principles and advanced technologies. The result: lighting that is future-facing, responsible, and respectful of the world around us.

From our home in Belgium to yours, our goal remains the same: to help you create spaces that feel as good as they look. With light that enhances, supports and elevates your everyday experience.

Welcome to Deltalight.
Welcome home.

WALL WASHING
WALL GRAZING

Six ways to make your home shine.

Light shapes how we live, move and feel at home. It's not just a single source, but a composition of layers - a principle known as layered lighting. Each layer has its own role. From soft background glow to striking focal points, together they create the right atmosphere for every room, every activity, every moment. Discover how to implement these six layers on the next pages.

WHERE LIGHT BECOMES
COMFORT

Six ways to make your home shine.

1

THE FOUNDATION

GENERAL LIGHTING

The everyday backdrop of your home. Bright, even light that makes daily life easier and more comfortable. General light sets the tone for the room, creating a clear and calm atmosphere that everything else can build on.

DDM Architectuur Photography: Lenzer

SIX WAYS TO MAKE YOUR HOME SHINE.

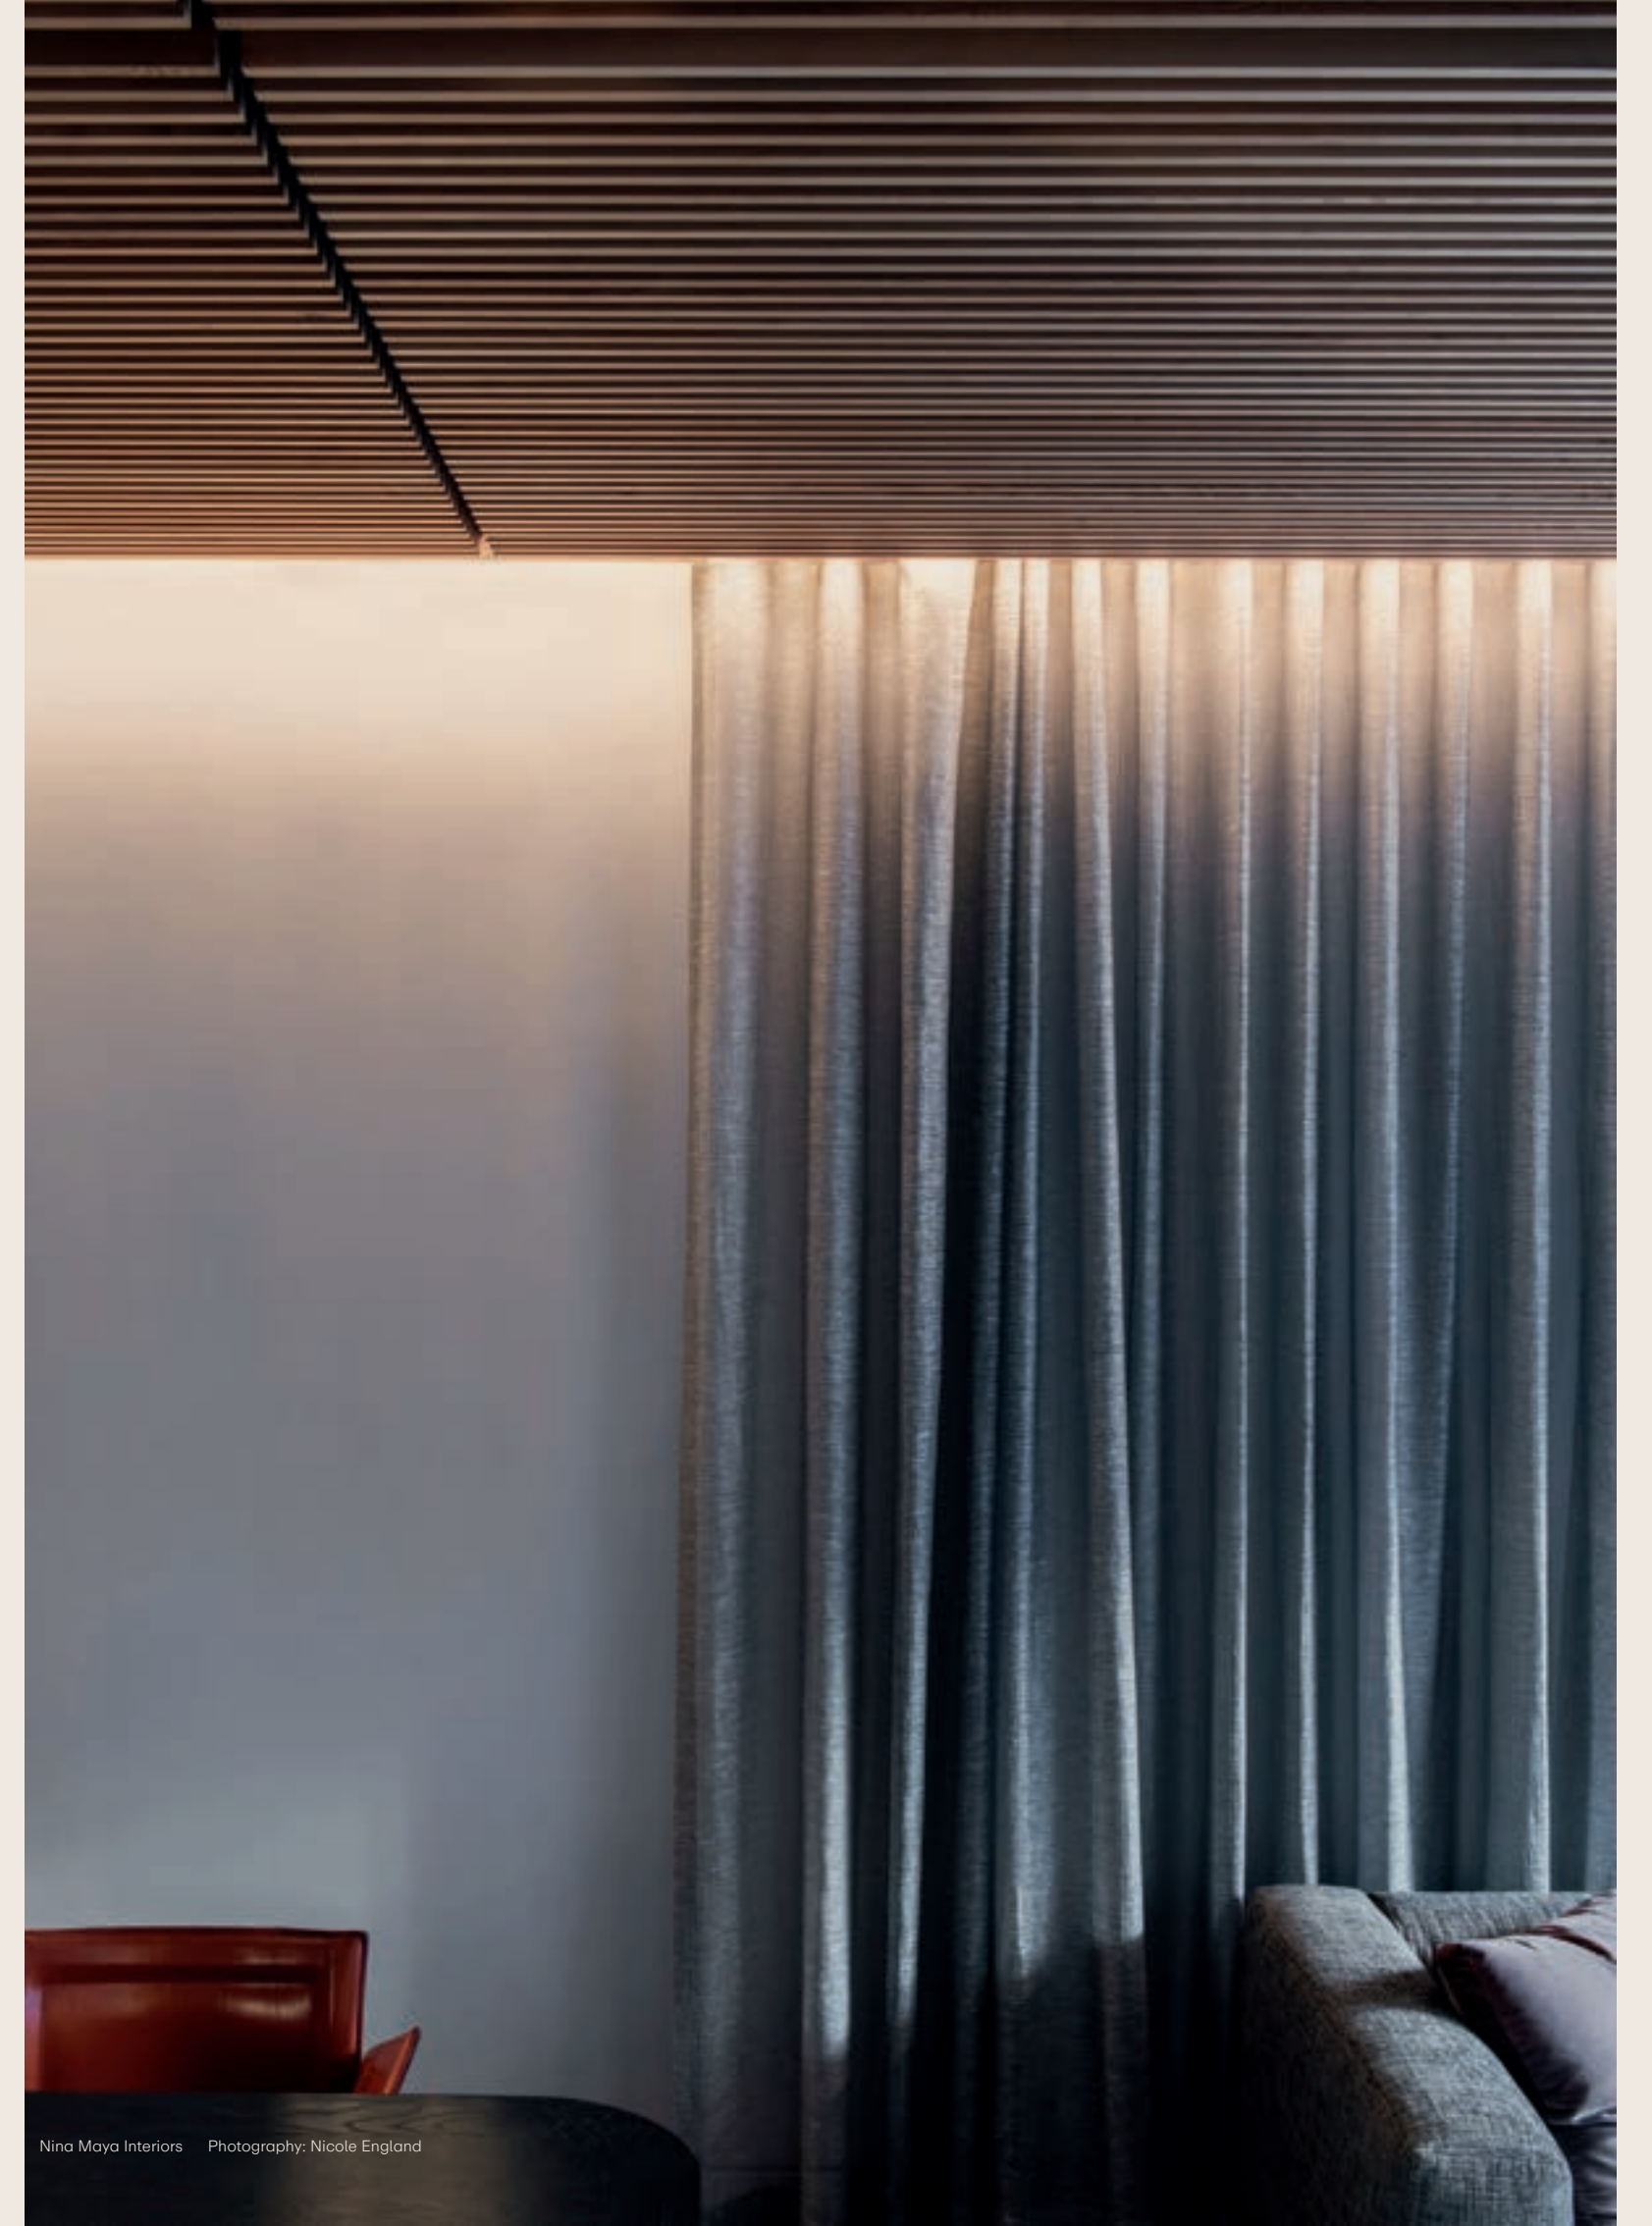

Six ways to make your home shine.

2

SOFTNESS THAT SURROUNDS

INDIRECT LIGHTING

A subtle way to add atmosphere. By reflecting light onto walls or ceilings, indirect light creates a soft, ambient glow that enhances comfort and brings depth to any interior.

Six ways to make your home shine.

3

THE STATEMENT PIECE

DECORATIVE LIGHTING

Where function meets emotion, where light becomes design. Sculptural fixtures and decorative luminaires do more than illuminate: they introduce personality, balance and elegance. These are the pieces that make a space memorable and uniquely yours.

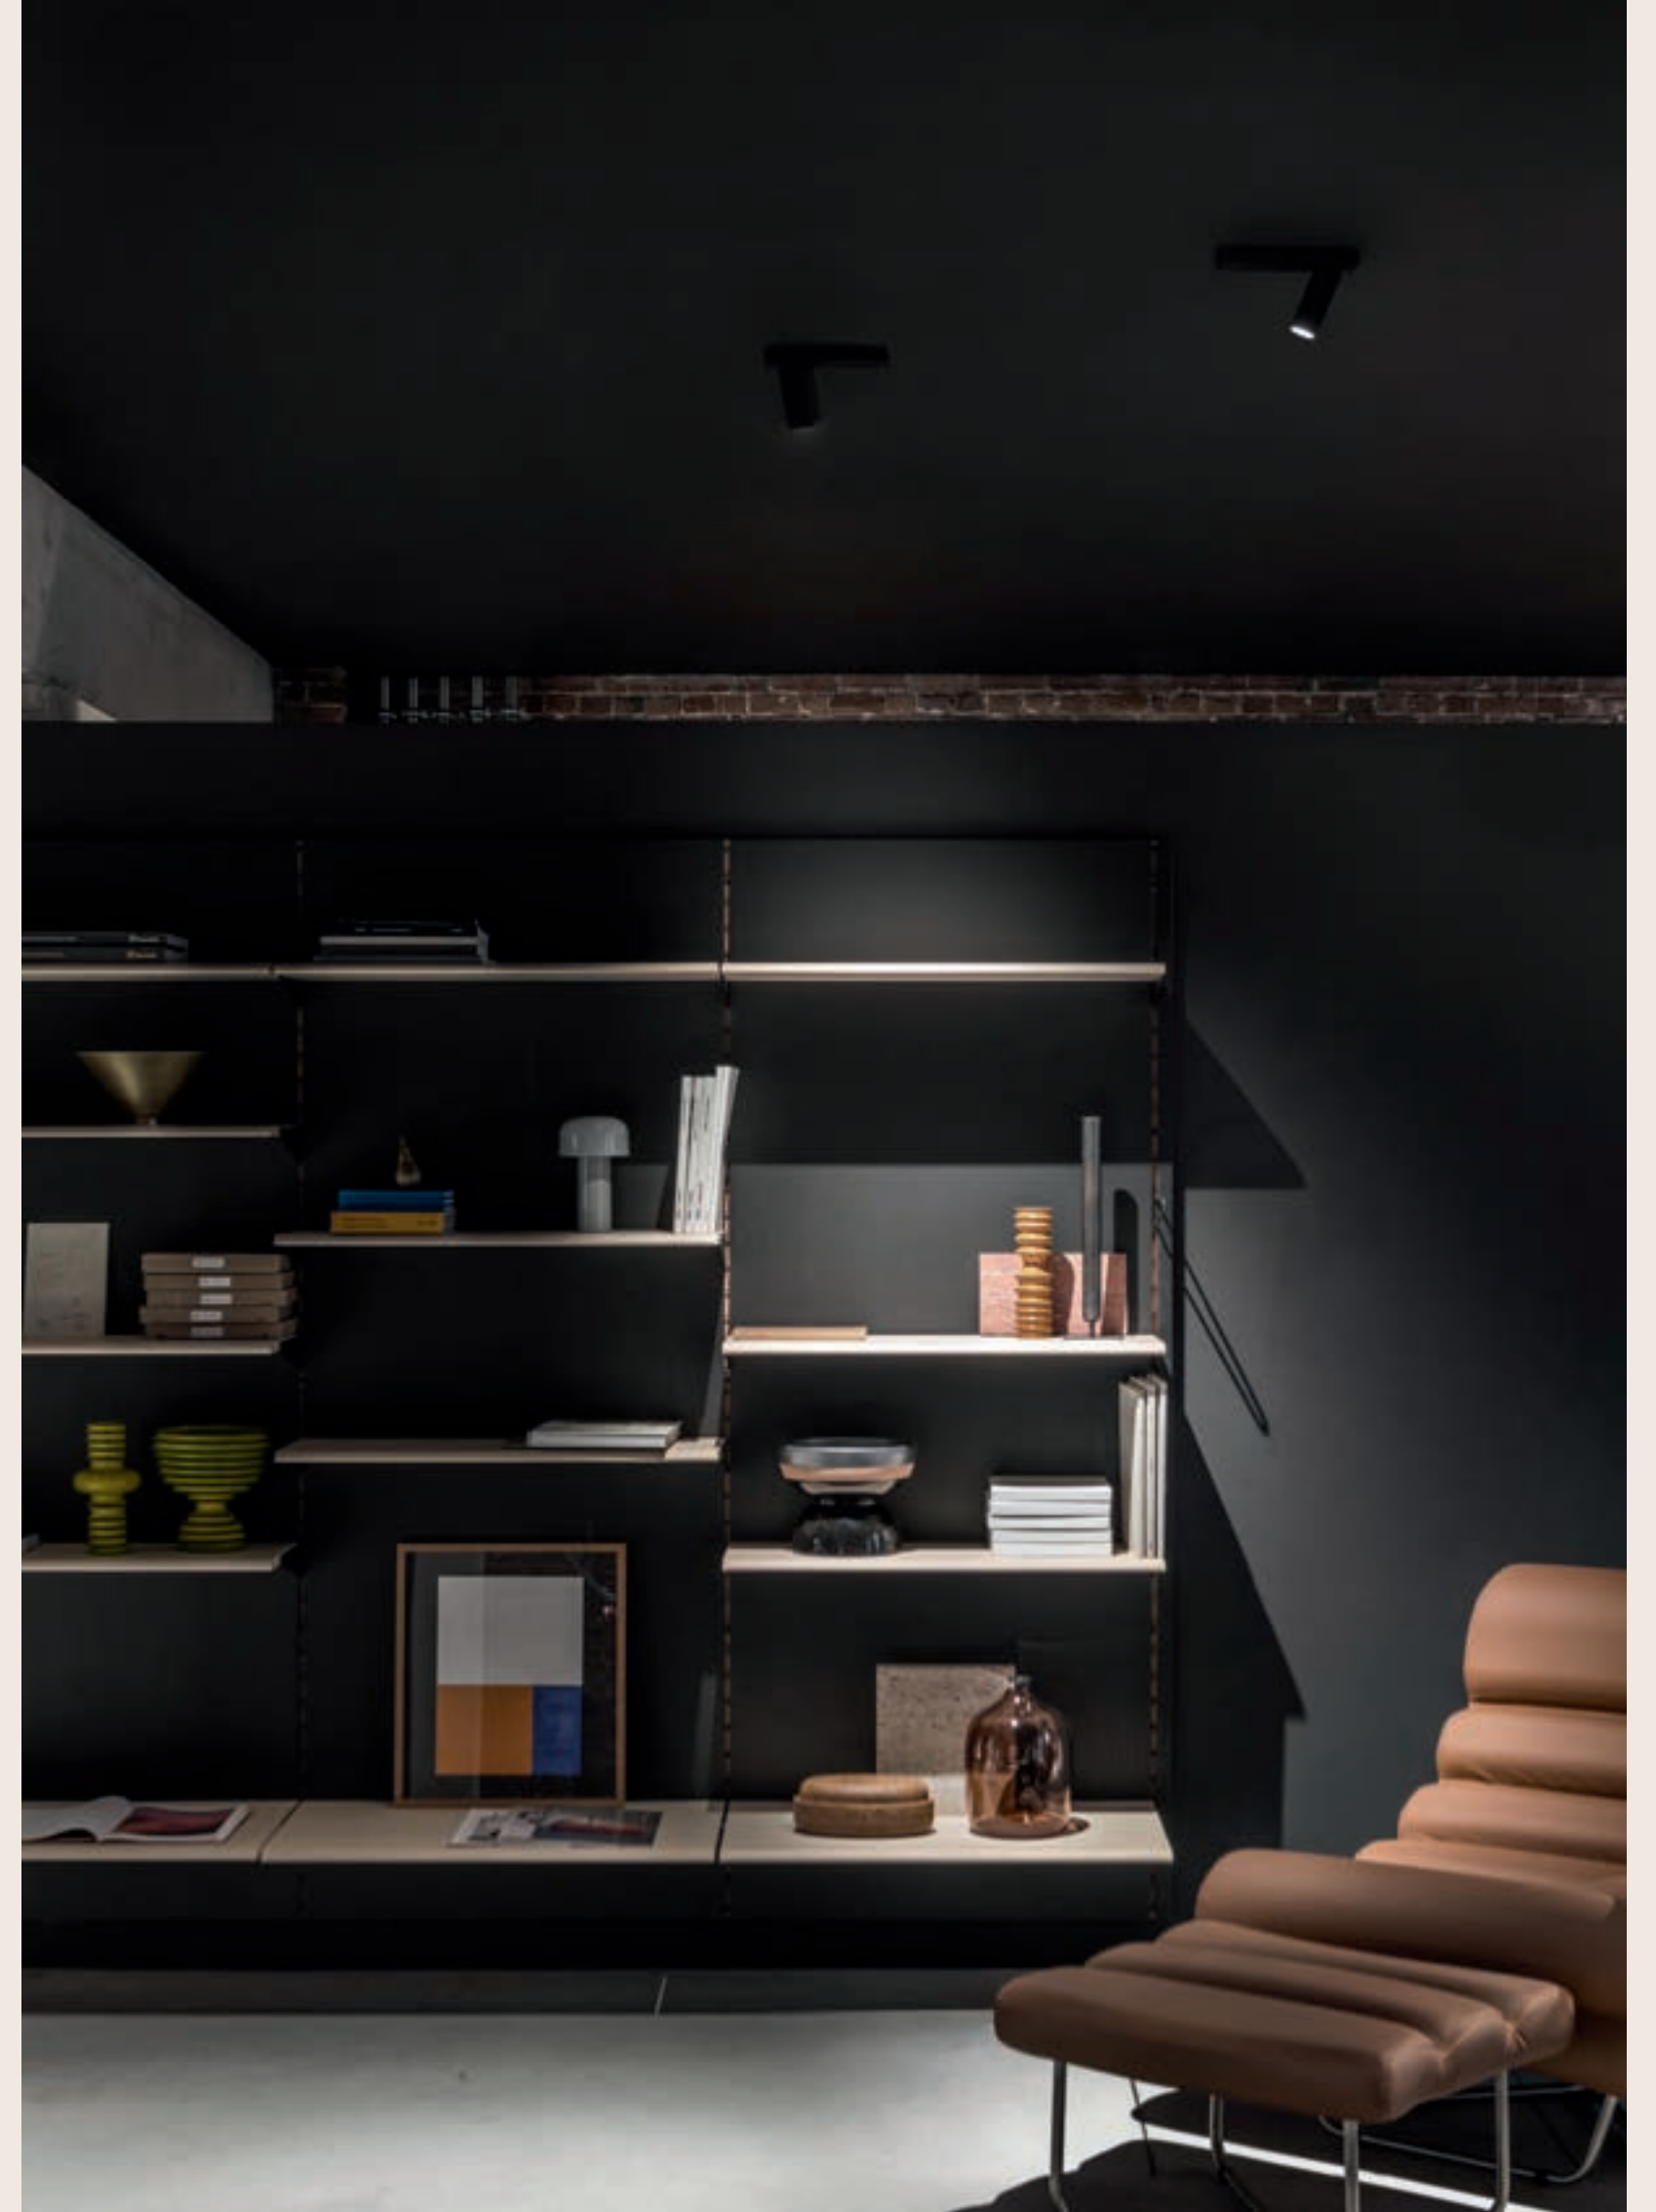

Six ways to make your home shine.

4

A SPOTLIGHT ON WHAT YOU LOVE

ACCENT LIGHTING

Light to guide the eye. A focused beam on artwork, textures or architectural details brings rhythm, contrast and refinement. Accent lighting adds dimension and visual interest, revealing what matters most to you.

Six ways to make your home shine.

5

FOCUS WHERE YOU NEED IT

TASK LIGHTING

Practical light designed for function. Whether in the kitchen, home office or beside your favourite chair, task lighting provides precision and brightness where needed. Discrete, effective and always reliable.

Govaert & Vanhoutte Architects

SIX WAYS TO MAKE YOUR HOME SHINE.

Six ways to make your home shine.

6

SHAPES ARCHITECTURE

WALL WASHING / WALL GRAZING

Walls tell stories too. Wall washing creates soft, even brightness that expands a room, while wall grazing highlights textures and shadows for a more dramatic effect. Both techniques enhance architectural character and spatial depth.

Govaert & Vanhoutte Architects

SIX WAYS TO MAKE YOUR HOME SHINE.

INDOOR

Bringing light to the heart of your home.

The moments that matter most happen indoors: mornings in the kitchen, quiet evenings in the living room, or conversations that linger late into the night. Light shapes how these spaces feel - offering clarity, comfort, and atmosphere day after day.

Our indoor collection is designed to complement architecture and materials, from subtle background glows to striking accents. Each fixture combines timeless design with lasting quality, so every room feels both functional and inviting. From first light to nightfall, lighting becomes part of the rhythm of your home.

OUTDOOR

Bringing the comfort of indoors outside.

A home doesn't end at the threshold. Terraces, gardens, pathways and patios are part of the same rhythm of living: places for connection, retreat and moments with nature. Outdoor lighting brings comfort and atmosphere into these spaces, turning them into true extensions of your home.

From inside to out, our lighting creates one continuous experience: uniting architecture, comfort and atmosphere across every space.

Build to withstand all seasons – from freezing winters to hot summers – our outdoor collection is designed for lasting reliability. Each fixture balances durability with atmosphere, so your exterior feels safe, inviting and alive. Even long after the sun has set.

THE *FINISHING* TOUCH

From harmony to contrast. The versatility of finishes.
At the heart of every interior are the thoughtful details that bring a space to life. We understand that the right finish can transform a simple lighting fixture into a defining element of a space or seamlessly blend into its surroundings and become purely functional.
This is what we call 'The Finishing Touch'.

GOLDEN HOUR

Like the golden light just before sunset, our gold finishes bring warmth, softness, and a refined glow. Whether matt, brushed or marbled, they offer richness without excess. Paired with stone, wood, or natural textures, gold brings a touch of timeless luxury that evokes both serenity and sophistication.

The soft glow of *gold*.

EARTH'S *WONDERS*

Our bronze, copper, and pine green finishes echo the colours and textures of the natural world. Evoking the tones of forest, soil, and mineral, they bring warmth and authenticity to interiors. Rich and grounding, these finishes create an atmosphere that feels connected, enduring, and effortlessly elegant.

Nature-inspired finishes.

CLASSIC *GRANDEUR*

White is more than a colour. It's a presence. It suggests purity, clarity, and sophistication. From soft matt textures to glossy or structured finishes, our white finishes create lightness and clarity. They offer a perfect canvas for architectural expression. Its timeless appeal makes it a perfect match for both traditional and contemporary settings.

The timeless allure of *white*.

INDUSTRIAL *CHIC*

Inspired by the honest beauty of industrial design, our aluminium, chrome and silver finishes celebrate simplicity with refinement. These materials carry a sculptural purity that is sleek, strong, and effortlessly modern. They bring an urban elegance that bridges the raw and the polished in modern interiors.

Opting for *raw elegance*.

MIDNIGHT *FLAIR*

There is power in shadow. Our black finishes, velvety matt or gleaming gloss, bring a sense of drama and subtle sophistication. Like the night sky, they invite a sense of mystery. Matt black absorbs light, adding softness and intimacy, while glossy black adds reflection and contrast. Together, they create contrast, structure, and a compelling sense of presence.

The *depth* of dark tones.

TACTILE FINISHES

Design is not only seen. It's felt. Our tactile finishes transform light into experience. The warmth of felt, the raw honesty of concrete, the delicate transparency of glass. Each invites touch and curiosity. Felt adds warmth and acoustic comfort. Glass introduces airiness and craftsmanship. Concrete offers boldness and a natural urban edge. Together, these materials make each luminaire not just a source of light, but a sensory design object.

The texture of *light and form*.

BRUSHED ALUMINIUM

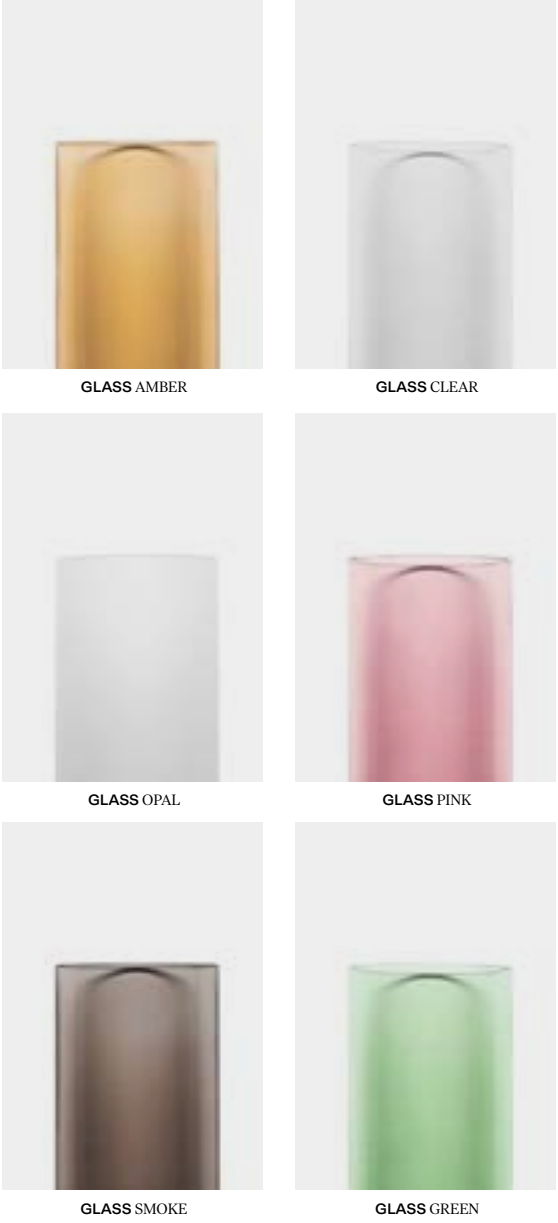

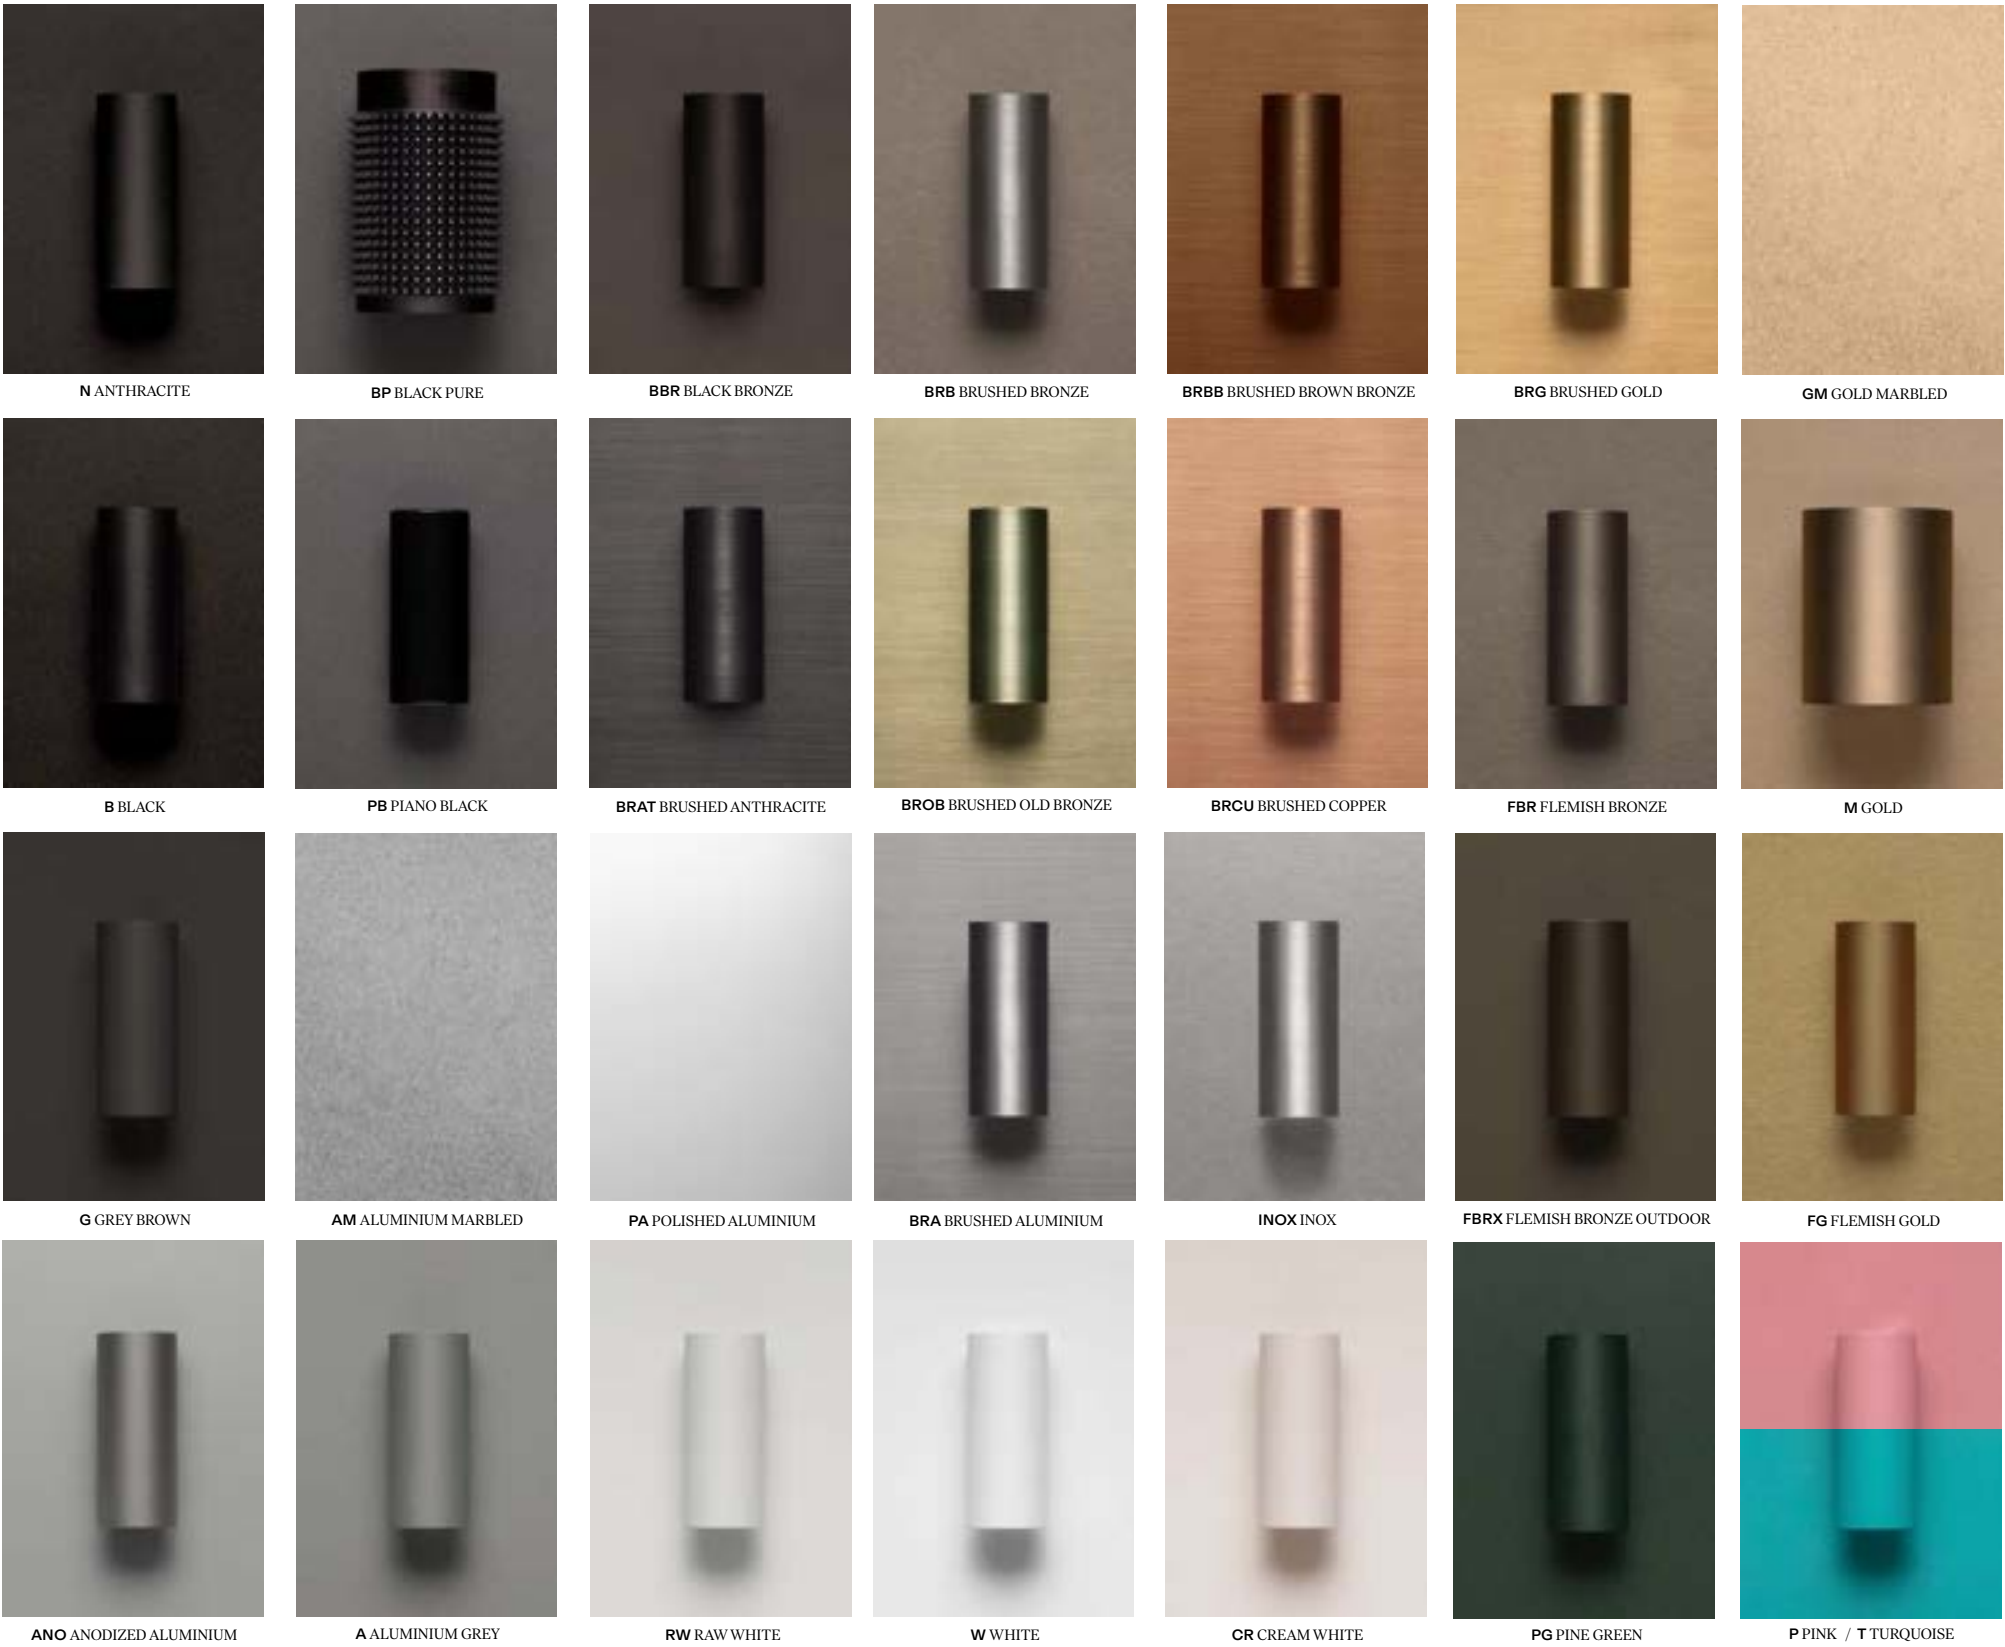

Brushed aluminium is a study in refined restraint. With its fine directional texture, it speaks of craftsmanship and care. Subtle rather than shiny, this finish complements a wide palette – available in anthracite, gold, copper, bronze and aluminium grey – and is the ideal choice for spaces where every detail counts.

An eye for detail.

FINISHES LIBRARY

This overview highlights the richness of our finishes and textures.
Availability depends on the product family; detailed options are listed
on each product page on our website.

Please Note
The appearance of our glass finishes can vary depending on the thickness of the glass and the amount of light it reflects or transmits. Additionally, each glass piece is unique, with subtle variations adding to its character.

Please Note
Due to the handcrafted nature of our finishes, slight colour variations may occur. Additionally, the colours shown in this catalogue or on screen may differ from the actual finishes. We have made every effort to provide the most accurate representation possible.

LIGHTING WITH PURPOSE.

At Deltalight, lighting is more than illumination – it shapes how we live, enhances comfort, and reflects the values that matter most. Every fixture we design tells a story: of craftsmanship, innovation, and respect for the world we share.

Innovation
for Today and Tomorrow.

Light that feels good today and makes sense tomorrow.

Sustainability is not just a fad.
It's the spirit of the age.

At Deltalight, we design lighting that feels good today and makes sense tomorrow. From production powered by 100% renewable electricity to packaging made from recycled and recyclable materials, every decision is guided by care for the environment.

Most of a light fixture's impact occurs during its use, but the story begins long before: in how it's made, transported, and powered. That's why we engineer products to last, combining high-quality materials and timeless design. Smart features such as motion sensors, daylight controls, and dimming options further reduce energy consumption, creating comfort with a lighter environmental footprint.

Our responsibility extends beyond the product. Over 80% of our purchasing volume meets strict ethical and environmental standards, and we support initiatives such as Light for the World, restoring vision for people in sub-Saharan Africa. Sustainability at Deltalight is about people, the planet, and performance; today and for generations to come.

DISCOVER OUR
SUSTAINABILITY
APPROACH
HERE

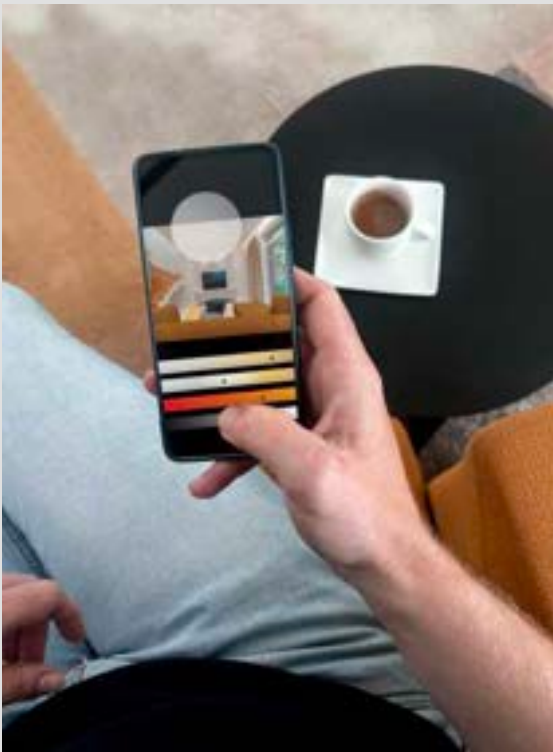

CTRL DELTA
Seamless, Smart Lighting.

We see innovation as more than technology – it's about improving your daily experience. The CTRL-Delta dimming system ensures your lights respond smoothly and precisely, creating flicker-free, perfectly controlled atmospheres in every room.

Whether you're brightening up for family moments or dimming down for a cozy evening, CTRL-Delta adapts effortlessly, delivering the lighting you want, when you want it.

Engineered to work with a wide range of LED and low-voltage systems, it combines reliability, efficiency, and simplicity – giving you beautiful, energy-conscious lighting that lasts.

With CTRL-Delta, innovation meets comfort: lighting that's intelligent, intuitive, and designed to enhance the way you live.

ABOUT
CTRL DELTA

▲IR by Deltalight
Light and Air in Harmony.

▲IR combines architectural lighting with intelligent air circulation, creating spaces that are both beautifully illuminated and naturally comfortable. This innovative system ensures optimal indoor air quality while maintaining a minimalist and elegant design.

Flexible systems such as ▲IR Modular allow you to tailor layouts to your architecture, while ▲IR Slot delivers sleek aesthetics without compromising performance. High-efficiency LEDs provide consistent, flicker-free light, and the quiet ventilation system adapts seamlessly to your needs.

With intuitive controls, ▲IR lets you adjust light and airflow effortlessly, reducing energy use while enhancing comfort. The result is a healthier, smarter, and more enjoyable environment – a space where technology, wellbeing, and design work together naturally.

We hope these pages have sparked new ideas and offered more than inspiration.
Perhaps a new way to reflect on what 'home' means to you. How light moves through
your day. How it feels. How it quietly yet powerfully shapes the way you live.
And helped you see light in a different way. More than a fixture or a source of
brightness, light is what shapes how a space feels.

Every home is unique. Yours carries its own rhythm, rituals and memories.
The right lighting doesn't demand attention, it simply supports those moments:
guiding, softening, highlighting and elevating the details that matter the most.

Your home, your rhythm, your light.

At Deltalight, we're here to help you imagine what's possible and bring it to life with
care, expertise and creativity. From the quietest corner to the most open view,
we believe light should make everything feel just right.

Welcome home.
